WEATHER OF CONCERN

Northern California

- Dry with near to above normal daytime temperatures and cool nights through Tuesday with smoke in the valley due to the Camp Fire.
 - Cooler and wetter weather is expected by midweek and for the holiday weekend.
 - Snow over the higher elevations of the Sierra for possible travel difficulties during Thanksgiving travel weekend.
 - Humidity will increase rapidly overnight Tuesday as significant wetting rains return to the area.
 - Strongest winds and heaviest rain can be expected Thursday and Friday.
- Friday through Monday, newly burned areas will likely see ash flow.
 - Major question is whether rain intensity could reach levels sufficient to cause more hazardous debris flows.
- The San Joaquin Valley Air Pollution Control District will keep the Air Quality Alert in effect due to smoke impacts from surrounding wildfires for San Joaquin, Stanislaus, Merced, Madera, Fresno, Kings, Tulare, and valley portion of Kern counties.
 - This Air Quality Alert is in effect until the fires area extinguished.

Southern California

- Rain and snow will be possible over the entire area beginning on Wednesday.
 - Lingering precipitation will occur on Thursday morning.
- Northern parts of the area on Friday will see additional rain and mountain snow.
 - High pressure will build in the area over the weekend and by Sunday patch fog will form in the San Joaquin Valley.

Key Points

11/19/18 - 11/25/18

Monday

- Offshore wind gusts of 20-30 mph in southern California will cause elevated fire weather concerns
- Widespread poor air quality due to smoke
- Dry conditions continue statewide

Tuesday

- Widespread poor air quality due to smoke
- Dry conditions continue statewide

Tuesday Night-Friday

- Periods of rain and mountain snow mainly across central and northern CA. Southern CA may see localized heavy precipitation but confidence is lower there.
- Snow levels will be around 5000-6000 feet across central and northern CA and 6000-7000 feet across southern CA
- Some rain may be heavy at times and may cause debris flow concerns over recent burn scars. Exact amounts and specific locations for the heaviest rain uncertain at this time.

Saturday-Sunday

- Drier weather potentially developing for the weekend

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

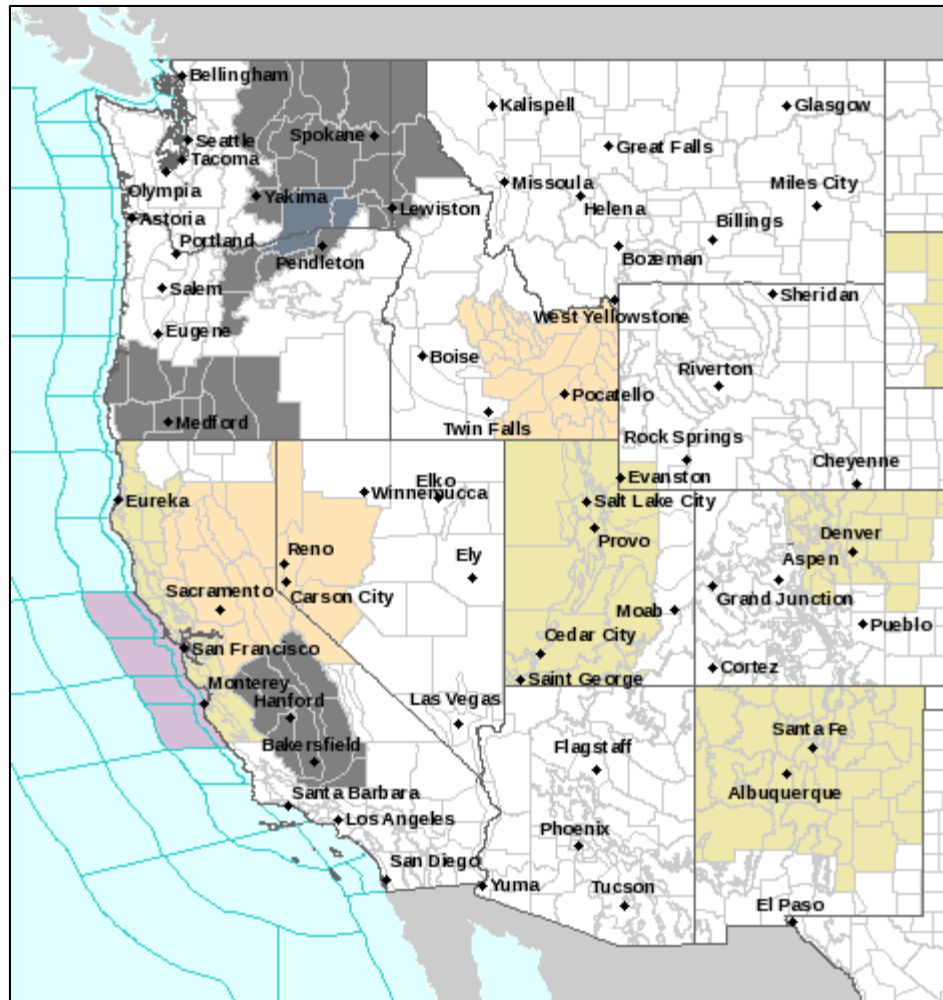

- Very dry conditions continue through Tuesday with a sudden change to rather moist conditions Wednesday into Thanksgiving weekend.
- Heavy precipitation at times in fire scar areas could create debris flows
- Warm, dry conditions will continue through Tuesday before a series of wet weather systems arrives.
- Locally heavy rain or snow at higher elevations (mostly 5500 ft +) is expected, particularly Thursday and Friday, and could lead to some debris flow conditions in this year's fire scar areas.
- A few areas of E winds with gusts to as much as around 35 mph and lower Relative Humidity (RH) around 25-35% will remain along the western slopes and drainages of the Cascades and Sierra this morning and develop again tonight before ending mid morning Tuesday.
- Gusty southerly winds expected to develop Tuesday afternoon and overnight ahead of the incoming weather system/precipitation could be accompanied by some low RH in favored areas, especially the Shasta Valley.
- Afternoon minimum RH's will remain fairly low (12-18%) through Tuesday then likely be over 50% or higher by Wednesday afternoon in most locations and remaining no lower than around 40% during the drier spells through next week.
- Afternoon high temperatures will remain 5-10 degrees above normal until Wednesday when they will cool to near or below seasonal normals. The warmest inland locations will have afternoon highs in the lower and mid 50s Wednesday into the weekend.

SOUTHERN CALIFORNIA

- A weak ridge of high pressure will sit over the West Coast through Tuesday. A couple of Pacific troughs will move into the West Coast from the Gulf of Alaska Wednesday through the end of this week. The first trough will be stronger and dig further south than the second trough. A weak ridge of high pressure will build into California from the Pacific Ocean this weekend.
- Maximum temperatures will be near normal through Tuesday, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys.
- Minimum humidity will be mainly in the teens away from the coastal areas through Tuesday.
- Winds will be light through Tuesday.
- Temperatures will cool to 5 to 10 degrees below normal Wednesday through Friday.
- Showers will develop over the northern parts of Central California starting Wednesday morning and then spread south into Southern California by Wednesday evening. These showers will persist through Thursday afternoon.
- Most locations will receive between a quarter inch and an inch of rainfall Wednesday and Thursday.
- Scattered showers will persist from a Monterey/Fresno County line northward Thursday evening through Friday night with up to an additional half inch of rainfall.
- The snow level will be between 6,000 and 7,000 feet.
- South winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Wednesday and then become westerly with the same speeds Thursday and Friday.
- Temperatures will warm and humidity will become low this weekend.
